DUNTRY	INFORMATION REPOR	25 X1
JBJECT	Supposed New Sowiet Pignter Plane 25X1	
		DATE DISTR. / 0 May 54
	THE DOCUMENT CONTAINS INFORMATION AFFACTING THE NATIONAL DEFENSE OF THE UNITED STATES OFTEN THE MEANING OF TITLE IS SECTIONS TO	NO. OF PAGES 1
	AND THE OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVEL LATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROMISITED BY LAW, THE REPORDENCTION OF THIS REPORT IS PROMISITED.	NO. OF ENCLS. 2
25X1	THIS IS UNEVALUATED INFORMATION	SUPP. TO REPORT NO.
	Nothing is known about a new Soviet interceptor Only the following facts have some to notice. Fr repeated experiments with septured sircreft of made by the Soviet authority at Peeneminds. The Peeneminds from Leipzig-Brandia, where they had appears in fact that the planes were brought to	rom 1949 until October 1953 the Me. 162-3 type were a planes were brought to lain since 1946. It
3.	Only the following facts have come to notice. Prepared experiments with septured sireraft of made by the Soviet authority at Peeneminds. The Peeneminds from Leipzig-Brandis, where they had appears in fact that the planes were brought to question. They dropped the landing gear after to planes originally were intended to be manned, the crews at Peeneminds. They had a span of 6.5 met have been observed since October 1953. The rocket installation where the planes were at attached map by the letters "Ra."	the Me. 162-3 type were a planes were brought to lain since 1946. It is start to the runway in the start. Although the toy were started without ora. No more experiments
2.	Only the following facts have some to notice. Prepared experiments with septured sireraft of made by the Soviet suthority at Peensmirds. The Peensmirds from Leipzig-Brandis, where they had appears in fact that the planes were brought to question. They dropped the landing gear after to planes originally were intended to be manned, the crews at Peensminds. They had a span of 6.5 met have been observed since October 1953. The rocket installation where the planes were st	com 1949 until October 1953 the Me. 162-3 type were a planes were brought to lain since 1946. It a start t the runway in the start. Although the toy were started without ters. No more experiments ored is indicated on the the former cost depot). Tests with these y Manauverobility from four he fraquency layout was front of the small beach pedoes are stored in Pecneminds
3.	Only the following fects have some to notice. Free repeated experiments with septured sireraft of made by the Soviet suthority at Peensminds. The Peensminds from Leipzig-Brandia, where they had appears in feet that the planes were brought to question. They dropped the landing gerrafter to planes originally were intended to be manned, the crews at Peensminds. They had a span of 6.5 met have been observed since October 1953. The rocket installation where the planes were at attached map by the letters "Rs." Torpedoes for Soviet simplanes are now stored in (indicated on the map by the legend "Lager Kohl" torpedoes have also been observed, carried out by Their range (maneuverable range) is about 8 km. frequencies at about 860,000 kHz (kilohertz). The estimated. The tests were made over the sea in meadow (Strandwiese). About 12,000 of these torp	com 1949 until October 1953 the Me. 162-3 type were a planes were brought to lain since 1946. It a start t the runway in the start. Although the toy were started without ters. No more experiments ored is indicated on the the former cost depot). Tests with these y Manauverobility from four he fraquency layout was front of the small beach pedoes are stored in Pecneminds
2. 3. 4.	Only the following fects have some to notice. Free repeated experiments with septured sireraft of made by the Soviet suthority at Peensminds. The Peensminds from Leipzig-Brandia, where they had appears in feet that the planes were brought to question. They dropped the landing gerrafter to planes originally were intended to be manned, the crews at Peensminds. They had a span of 6.5 met have been observed since October 1953. The rocket installation where the planes were at attached map by the letters "Rs." Torpedoes for Soviet simplanes are now stored in (indicated on the map by the legend "Lager Kohl" torpedoes have also been observed, carried out by Their range (maneuverable range) is about 8 km. frequencies at about 860,000 kHz (kilohertz). The estimated. The tests were made over the sea in meadow (Strandwiese). About 12,000 of these torp	the Me. 162-3 type were a planes were brought to lain since 1946. It a start t the runway in the start. Although the toy were started without ters. No more experiments ored is indicated on the the former cost depot). Tests with these y Soviet two-engined planes. Mensuverability from four the fraquency layout was front of the small beach medoes are stored in Peeneminde d in flight to be about 65 cm.
2. 3. 4.	Only the following facts have some to notice. Freeward experiments with contured sircraft of made by the Soviet authority at Peeneminds. The Peeneminds from Leipzig-Brandia, where they had appears in fact that the planes were brought to question. They dropped the landing gerr after to planes originally were intended to be minned; the crews at Peeneminde. They had a spen of 6.5 met have been observed since October 1953. The rocket installation where the planes were at attached map by the letters "Rs." Torpedoes for Soviet sirplanes are now stored in (indicated on the map by the legend "Lager Kohl" torpedoes have also been observed, cerried out by Their range (maneuverable range) is about 8 km, frequencies at about 860,000 kHz (kilohertz). The estimated. The tests were made over the sea in meadow (Strandwiese). About 12,000 of these torpeto was judged at present. The length of the torpedo was judged	the He. 162-3 type were planes were brought to lain since 1946. It a start t the runway in the start. Although the top were started without ters. No more experiments ored is indicated on the the former cost depot). Tests with these y Soviet two-engined planes. Maneuverobility from four he fraquency layout was front of the small beach medoes are stored in Peenemunde d in flight to be about 65 cm.
